

SAGMETIC INFOTECH

Careers Functionality / Job Portal

1. Overview

The Job Portal Functionality would be implemented in order to enable the process of job exploration, application, and submission on the website. Users will be able to navigate through job listings, view detailed job descriptions, and apply for positions that match their qualifications.

2. Key Features

2.1 Career Page

Description: Develop a dedicated "Careers/Job Listings" page accessible from the main navigation menu

Functionality:

--Display a list of available job positions.

--Search bar present for searching jobs available using ajax.

--Display job title, description, qualifications, responsibilities, and any other relevant details.

--Individual pages for each job listing with detailed information.

--Include a "Apply Now" button linking to the job details page.

2.2 Job Details Page

Description: Detailed information page for each job listing.

Functionality:

Provide in-depth details such as salary, skills required, experience level, location and other relevant information.

Include an "Apply Now" button leading to the application form.

2.3 Application Form

Description: A user-friendly application form for interested candidates for the selected job.

Functionality:

Include fields for personal information, contact details, address, uploading resume, etc.

Implement validation to ensure all required fields are filled.

Provide options for additional features like applying with LinkedIn, Indeed.

2.4 Application Confirmation Page

Description: Confirmation page or email notification upon successful application submission.

Functionality:

Acknowledge the user for successfully applying to the job.

Email to the admin and User upon application confirmation.

ADMIN FUNCTIONALITY
